NAME
>   curl_share_cleanup - Clean up a shared object

SYNOPSIS
>   **#include <curl/curl.h>**
>
>   **CURLSHcode curl_share_cleanup( );**

DESCRIPTION
>   This function deletes a shared object. The share handle cannot be used anymore when this function has
>   been called.

RETURN VALUE
>   If this function returns non-zero, the object was not properly deleted and it still remains!

SEE ALSO
>   **curl_share_init**(3), **curl_share_setopt**(3)
