

ZyXEL

DECT Phone, Best Partner for VoIP DECT Station Gateways

- DECT-standard and GAP Compliant Handset
- 65 K Color Display with Graphic Menu
- Hands-free Speakerphone Available
- Caller ID Support
- Low Power Consumption Design

Benefits

An Ideal VoIP DECT Station Gateway Solution

ZyXEL V250 is a DECT standard-compliant phone handset, as well as an ideal partner of ZyXEL VoIP DECT Station Gateways, such as the P-2302HWUDL-P1, to turn the fixed VoIP telephony into cordless transmission.

Low-cost VoIP Mobility

The V250 is ZyXEL's DECT (Digital Enhanced Cordless Telecommunications) phone handset. Integrated with ZyXEL VoIP gateways such as the P-2302HWUDL-P1, the V250 can turn fixed VoIP to cordless and present the mobility power to users.

GAP Compliant

The V250 can work with other GAP-Compliant phones allowing easy expansion of your phone system.

Lower Power Consumption

With ZyXEL V250, users will not only take advantage of the better VoIP mobility, but also benefit from longer phone operating time with significantly lower power consumption. Regardless of the location in the house, users can enjoy the ease-of-use and freedom of telephony services over IP or PSTN networks.
